# Problem Solving

Choose one of the problems below!

Karen ordered some tubs of ice cream but forgot how many she ordered! She remembered that it was less than 20, and there was a 1 in the number. How many could she have ordered?

Karen ordered some tubs of ice cream but forgot how many she ordered! She remembered that it was less than 50, and there was a 2 in the number. How many could she have ordered?

Shapes

Which one do you think doesn't belong? (Note: You can make a case for each of them!)

Subtraction

Choose one of the questions below!

How many ways can you find the difference between 8 and 4?

How many ways can you find the difference between 24 and 5?

How many ways can you find the difference between 92 and 31?

Patterns

What do you notice? What type of pattern is this?

(Bonus: Can you make a pattern out of something following the same rule?)
